Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, 8, 10, 11, 24, and 27-32, drawn to a method of delivering an arteriogenic factor to a vessel region, classified in class 604, subclass 500.
- II. Claims 7, 9, 12-18, 25, and 26, drawn to delivering a chemical factor to the vessel region, classified in class 544, subclass 122.
- III. Claims 20-23, drawn to delivering a chemical factor including gene constructs to the vessel region, classified in class 435, subclass 2.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as delivering an thermal factor to a vessel region. See MPEP § 806.05(d).

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are

shown to be separately usable. In the instant case, invention I has separate utility such as delivering a thermal factor to a vessel region. See MPEP § 806.05(d).

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as delivering a gene construct to a vessel region. See MPEP § 806.05(d).
